

Fund Objective: capital growth with less of the volatility of equities. The Fund invests predominantly in global equities and corporate bonds, other listed securities, government bonds, and money markets.

Investment Process: the manager follows the fundamentals of the business cycle to select individual equity and bond investments with attractive and complementary risk and return profiles within a through-cycle four phase asset allocation framework.

Investment Outcome: over a full business cycle the manager seeks to deliver a total return in excess of the Performance Benchmark, comparable to inflation +3-4% in normal circumstances, and comparable to the long-term return on equities. Fund seeks to generate a 'natural' level of income from bond interest and equity dividends that should be sustainable across the business cycle.

Performance Benchmark: the average of the return on an index of short-dated UK Government bonds (upto five years maturity) and rolling five year CPI. The purpose of this benchmark is stability: historically the average of each of these has been about 3-4%, but when one is lower the other is normally higher, offering a steady 'risk free' measure that also accounts for inflation.

Fund Sector: IA* Mixed Investment 20-60%, Morningstar GBP Moderately Adventurous. Equity investments are limited to 70% of Fund and unhedged foreign currency to 30% of Fund.

COMMENTARY

Strong gains across all asset markets this quarter have substantially recouped the steep market declines of the end of last year;

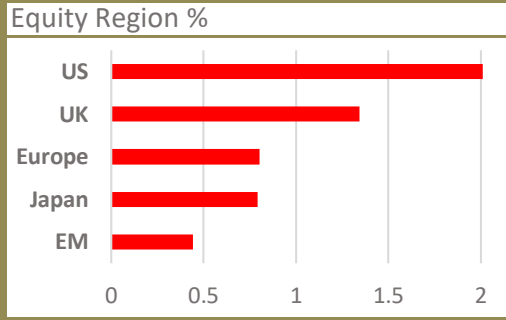

US Federal Reserve signalled a pause to rising interest rates and this restored confidence in markets though the US economy remains at full employment and wages are rising;

US-China trade negotiations continue amidst optimism for a constructive deal possible within weeks which may boost confidence further, restoring growth momentum;

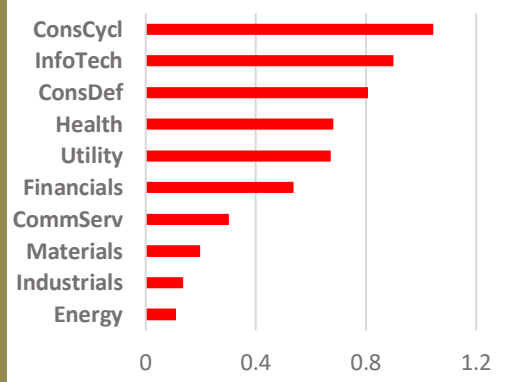

Many key measures of economic activity have weakened globally during the quarter: in the Eurozone, where central bank intervention may be required once more; and in the UK where Brexit uncertainty continues beyond the exit date.
