Tellsons does not offer investment advice or make any recommendations regarding the suitability of its products and no information contained in this report should be construed as advice. The value of investments can go down as well as up, and non-sterling currency exposures are unhedged and can influence your returns. Investors may not get back the original amount invested. Past performance is not a guide to future performance. An English language prospectus and KIID are available for the FP Tellsons Endeavour Fund and investors should consult these documents before making an investment decision.

FP TELLSONS ENDEAVOUR™

Our aim with Endeavour is to generate capital growth, similar to what can be expected from equities over the full business cycle, but with less of the volatility of equities, less of the bumpy ride. We make investments in the publicly-listed equity and debt of industrial companies in the UK and in other markets overseas, principally Europe and the US. The combination of debt and equity gives us the flexibility to capture opportunities as they arise across these different markets, and potentially with more stability as bonds and equities often perform differently to each other. This means that most of the time we can aim to generate positive returns in any given 12 month period.

We make our investments in bonds and equities in order to capture the optimal returns that are available given a company's prospects at different points in the business cycle. This enables us to take advantage of opportunities for protection, income generation and capital growth whenever these opportunities are most compelling and NOT when a specific market benchmark tells us we must. We do this in one fully integrated team investment process across both bonds and equities. We like companies that may be rich in assets, generate strong and stable cashflows, or which may have market leading positions in their product lines and high barriers to entry from competition.

- Endeavour is the only investment strategy we manage
- Our money is invested in it
- Aligning our interests with yours

- Flexible fees, genuine 'riskless' benchmark
- No leverage or short-selling
- No fees on fees of investment in other funds

INVESTMENT COMMENT - MARCH

Bonds and equities appeared to hold their breath somewhat during the month in anticipation of the upcoming corporate earnings season. Economic news continued to improve but the gains were so modest and mixed as to be almost imperceptible.

FUND TYPE: UCITS IV OEIC

The value of investments can go down as well as up, and non-sterling currency exposures are unhedged and can influence your returns. Investors may not get back the original amount invested. Past performance is not a guide to future performance. An English language prospectus and KIID are available for the FP Tellsons Endeavour Fund and investors should consult these documents before making an investment decision.

ACTIVITY

We added further to our bond investments during the month to improve our overall yield whilst maintaining a relatively short maturity profile, call-adjusted, of around 5 years.

PERSPECTIVE

Quarterly earnings announcements starting in April will be scrutinised for signs of accelerating activity and, critically, business investment. The nervousness apparent in March could well persist into this Spring.

Top 5 Investments in Equities and Bonds account for 23.6%

Equity		Bond		
Company	Holding	Company	Call Date / Maturity	Holding
National Grid	2.6%	Gen. Electric	2016	4.8%
